private podiatry & chiropody care in london

Podiatry (“podo” from the Greek meaning “foot”) is a branch of medicine devoted to the study, diagnosis and treatment of disorders of the foot, ankle and lower leg.

Whilst chiropody and chiropodists are concerned with the routine process of foot care, podiatrists are fully qualified lower limb specialists, able to carry out routine treatments, administer local anaesthetics, perform nail surgery, prescribe certain medications and conduct bio-mechanical assessments (the study of the human walking cycle).

With a Bachelor of Science Honours Degree in Podiatric Medicine, I am registered with the Health Professions Council (HPC) and The Society of Chiropodists and Podiatrists.
